**About Redx Pharma Plc**

Redx Pharma (AIM:REDX) is focused on the discovery and development of novel targeted medicines for the treatment of cancer and fibrotic disease, aiming to progress them to clinical proof of concept. Redx's lead oncology asset, RXC004, is currently in a Phase 1 study in patients with advanced malignancies with top line monotherapy data expected in mid-2021 and the Company's selective ROCK2 inhibitor, RXC007, is expected to enter a Phase 1 clinical study in H1 2021.

The Company's core capability of converting medicinal chemistry insights into differentiated and commercially attractive small molecule drug candidates against clinically validated targets has been recognised by others. Over the last three years the company has completed four major preclinical stage deals with AstraZeneca, Jazz Pharmaceuticals and Loxo Oncology (now Eli Lilly).
